

This letter serves as an endorsement of Stage7 Systems.

Tenet recently embarked on the path towards implementing a full electronic health record solution in 52 hospitals to better serve the needs of our patients and clinicians, and to meet requirements for the American Recovery and Reinvestment Act (ARRA). Due to the scope of this project, many new positions were created which necessitated highly skilled workers with both clinical expertise and information technology (IT) knowledge.

Stage7 Systems has been able to effectively meet my needs for hiring Clinical IT staff. When working with them, I only received resumes that were relevant and qualified for the positions and I was able to hire a Corporate Director of Clinical Informatics very quickly and with no problems. Not only were the candidates of the highest quality, working with the Stage7 Systems staff and our Compensation & Relocation departments was also very efficient and reasonable. I hope to continue using them for additional positions in the near future.

I would definitely recommend Stage7 Systems for any type of corporate or executive level positions. They are professional, friendly, and extremely good at what they do.

Sincerely,

Mary Beth Mitchell
Sr. Director, Applied Clinical Informatics
Tenet Healthcare System
