

This letter serves as an endorsement of Stage7 Systems.

UT Southwestern Medical Center's Laboratory Information Services department recently launched a migration effort from Cerner Classic Lab to Sunquest Laboratory. Due to the scope of this project, our internal resources were stretched and we required assistance with continuing to support the Cerner environment until the migration to Sunquest was complete.

After reaching out to Stage7 Systems to provide back-fill Cerner support we were presented with a couple of excellent Cerner consulting resources that were available immediately. We had the opportunity to speak with each consultant and upon making our final selection, we were able to work with Stage7 Systems to quickly finalize project start dates, schedules, contracts, etc.

The Cerner consultant from Stage7 Systems has done a great job and was able to hit the ground running, which has enabled our internal team to remain focused on completing our Sunquest migration knowing that the Cerner systems are in good hands.

Overall, our experience engaging with Stage7 Systems has been positive and I would definitely recommend working with them.

Regards,

Raymond Williams
Director, Laboratory Information Resources
