

I wanted to take moment to thank you for the excellent assistance Stage7 Systems recently provided to us during a successful project to deploy one of our applications across an open network utilizing the advanced encryption, and secured link capabilities of Citrix XenApp.

The expertise and responsiveness of your staff and their willingness to go the extra mile to work with us on short notice and over a weekend was impressive and very much appreciated. The assistance we received from Stage7 Systems was critical to our success in meeting our goals for that project.

Please feel free to use me as a reference. I would be happy to share with others the role of Stage7 Systems as a valued member of our team in that project.

Sincerely,

Glenn Jenkins
